Solution for accelerating the creation of an MCQ bank

Creates exercises with multiple-choice questions or single-answer questions in Excel.

This extension enables you to load predefined exercises easily in a training path on the MOS Chorus platform.

MOS MCQ

Quick and effective

Generate activities by combining two types of questions, single-answer and multiple-choice questions. Enter the title of the exercise, the questions, the score, the instructions and the correct answers.

Easy to use

You can create an online questionnaire in Excel easily. Only available online, and not with MOS Solo.
