

# Case study: STS

## The client:

**STS Sauter Training & Simulation** is a company based in Lausanne, Switzerland, that specializes in project management training. STS tools have been translated into 20 languages and are deployed all around the world. Since 1996, STS has trained more than 126'000 project leaders in 50 countries. STS also offers a preparatory program for the PMI and IPMA certification exams (through blended e-learning and classroom-based trainings) as well as a simulator of the PMI and IPMA exams.

## The issues:

- The need to use an LMS that clearly separates the administration side of the LMS from the content side
- Ability to optimize maintenance and ease of use of the LMS and to optimize content management
- Need for compliance with the SCORM standard

## Our solutions:

- **MOS Chorus** as a platform for managing eLearning: STS chose the platform for the ease of managing learners and its user friendly interface
- The platform was **personalized** in order to allow particular functionalities such as the handling of open-ended questions
