# MOS Player now also available for iPad!

**You can now follow your eLearning courses on the road and offline on your iPad using MOS Player for iPad!**

**All progress in the modules you've downloaded and the results and scores you have achieved in offline mode are immediately synched once you reconnect.**

## ● For learners

MOS - MindOnSite has released the iPad version of its well established eLearning content player for offline use, MOS Player.

## ● For training managers

There is nothing like a simplified deployment of training programs!
Prepare the enrolment list and the courses on your LMS. With the Cloud technology, they are distributed to the right audience who will get trained whenever they feel like it. All you have to do is follow their progress!

## ● Get trained anytime anywhere

Learning wherever and whenever you want, at your own pace, with or without an Internet connection.
The MOS Player for iPad app lets you follow your training modules on your iPad, whether you are in online or offline mode.

## ● Variety of modules

You created some of your training modules on a SCORM compatible content editor other than the ones offered by MOS – MindOnSite.
With the MOS Player for iPad app and thanks to the SCORM 2004 eLearning standard, you can easily distribute them and still retrieve progress, results and scores.

## Smart Learning Solutions

# Time lost in travelling is time gained for training!

**MOS Player for iPad is a brand new solution offered by MOS - MindOnSite that meets the needs of the ever growing population of iPad users – those who wish to follow their eLearning courses when they are on the plane, train, bus or sofa.**

**At MOS - MindOnSite we believe that time lost in travelling or commuting is time gained for training!**

**We have designed this app to extend the benefits of MOS Player to those who spend a lot of time on the road.**
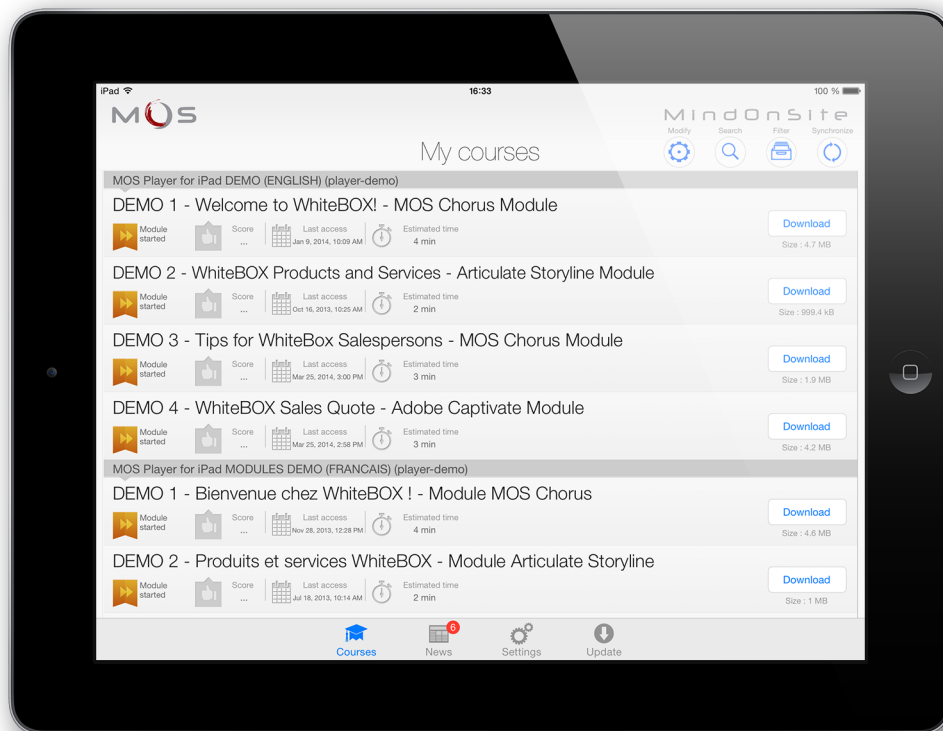

**MOS Player for iPad automatically connects to the MOS Chorus Learning Management System (LMS), keeping track of all scores and progress.**

With MOS Player for iPad,

Learners can…

- follow their eLearning courses without an Internet connection
- pause or interrupt their training at any time and pick up later exactly where they left off
- sync their locally saved progress and results as soon as they go back online
- read news and announcements even when they are offline
- centralize content from several LMSs

Administrators can…

- easily monitor the learning progress of travelling employees due to the application's SCORM 2004 compatibility and automatic synchronization
- ensure all travelling employees only have access to the most up-to-date learning content
- feel reassured that all the information between the application and the LMS is transmitted in a totally safe, secure and reliable way
- share news and announcements with learners
- distribute content created on MOS Chorus, Adobe Captivate, Articulate, Inovae Publisher…

**MOS Player for iPad is available for free download on the App Store.**
