A learning analytics Solution

Lets you explore your training data through beautiful, interactive and smart visualisations

Highlights your key performance indicators (KPI)

MOS - MindOnSite relies on the professional solutions of Qlik®, market leader in visual analysis.

Dynamism of data

Smart visualisation: the data automatically adapts to the predefined parameters and to the chosen filters. Interactive visualisation: it instantly responds to interactions and changes in context.

The data is loaded in predefined visualisations in a quick and smart way.

Data centralisation

You have access to a complete and uniform view of all your data that you manage and share from a central hub.

Your data is safely collected and shared.

Eye-catching and ready-to-use

Visualisation is beautiful and modern. Only data that you consider relevant is displayed.

You have access to a templates and dashboard library that you can use to display your data in a graphically appealing way.

Simple to customise

You can create and edit your own dashboards with a simple drag-and-drop.

We offer several options for integrating dashboards into the portal interfaces of your learners, managers and training managers.
