Solution for accelerating MCQ creation

Creates single-answer or multiple-choice questions (MCQ) from an Excel file.

Eases the addition of predefined exercises in a course in the MOS Chorus platform.

Quick and effective

Create your questions in an Excel file, by entering information such as exercise title, questions, score, instructions and correct answers.
Then, simply import your Excel file directly in the MOS Chorus platform.

Easy to use

Combine single-answer and multiple-choice questions, import predefined exercises, easily enrich your learning courses.
