

# Solution for organising your training sessions

Displays a dynamic calendar for learners, tutors, managers, supervisors and administrators

Helps organise training sessions (face-to-face training, eLearning course, coaching, virtual sessions)

## Simplicity for learners

Learners have a dynamic view of their training courses for which they are registered. They can add them to their calendar (Outlook, iCal, Lotus Notes, Gmail...).

They can sign up or ask their manager. They are automatically notified if there is a change in the schedules.

## Dynamic view for managers and tutors

Managers and tutors have access to an overview of the groups or sessions they manage. They can confirm attendance and export attendance lists.

Tutors can additionally change sessions' information (dates, name, time zone...).

## Time saved in administration

Administrators manage all sessions and all participants in one single calendar. They can generate lists of attendees and link a session to a satisfaction survey.

The synchronisation between MOS Chorus and MOS Calendar is instantaneous.

## Adapted to international

You can choose a time zone when creating training sessions and edit it afterwards.

Extension available from the 041 version of the MOS Chorus LMS platform
