

# MOS Player for iPad, offline content player

You can now follow your eLearning courses on the road and offline on your iPad using MOS Player for iPad!

MOS Player for iPad is a solution designed by MOS – MindOnSite to meet the learning needs of the ever growing population of iPad users.

## Get trained anytime anywhere

Learning wherever and whenever you want, at your own pace, with or without an Internet connection.

The MOS Player for iPad app lets you follow your eLearning modules on your iPad, whether you are in online or offline mode.

## Diversity of modules

You created some of your training modules on a SCORM compatible content editor other than the one offered by MOS – MindOnSite.

With the MOS Player for iPad app and thanks to the SCORM 2004 eLearning standard, you can easily distribute them and still retrieve progress, and results.

# MOS Player for iPad

## Learners on the road

Your learners download their learning modules before leaving and follow them in offline mode. The results and progress are automatically synchronised once the connection to the Internet is back.

## Training Managers

There is nothing like a simplified deployment of training programmes!  
Prepare the enrolment list and the courses on your LMS. With the Cloud technology, they are distributed to the right audience who will get trained whenever they feel like it. All you have to do is follow their progress!

# Time lost in travelling is time gained for training!

MOS Player for iPad is an app for iPad that lets you follow your eLearning courses whether you are in online or offline mode.

You can follow your course when you are on the road or simply offline, and then synchronise your results with the LMS (Learning Management System) platform.

MOS Player for iPad automatically connects to the MOS Chorus Learning Management System (LMS), keeping track of all scores and progress.

## With MOS Player for iPad,

Learners can...

- Follow their eLearning courses without an Internet connection
- Interrupt their training at any time and pick up later exactly where they left off
- Synchronise their locally saved progress and results as soon as they go back online
- Read announcements in offline or online mode
- Centralise content from several LMSs

Training Managers can...

- Easily monitor the learning progress of travelling employees due to the application's SCORM 2004 compatibility and automatic synchronisation
- Ensure all travelling employees only have access to the most up-to-date learning content
- Feel reassured that all the information between the application and the LMS is transmitted in a totally safe, secure and reliable way
- Share news and announcements with learners
- Distribute content created on MOS Chorus, Adobe Captivate, Articulate, Inovae Publisher...

The app MOS Player for iPad is available for free download on the App Store.
