

Ecole de la deuxième chance (e2c)

The mission of “Ecoles de la 2e Chance” is to fight school dropout amongst young people and to help them get a diploma to be reintegrated into society. The “Ecole de la 2e Chance” of Marseille is the 1st school of its kind created in Europe. Since its creation in 1997, dozens of similar structures opened up throughout Europe.

ISSUE

Extend their activities to other regions, guaranteeing :

- Validation and accreditation of trainees’ skills through online training of basic sets of skills,
- Quality in guidance and monitoring to meet similar standards as in traditional training,
- Reduction of operating costs per trainee, in order to be able to assist a larger number of trainees.

SOLUTION

- MOS Chorus, a blended platform forming part of the schools organisational model :
 - Face-to-face or online monitoring of a trainee or a group of trainees (dashboards)
 - Implemented workflows where trainees, teachers and pedagogical managers are in the heart of the system
- A pool of content for the entire network and a training program administration, decentralised in each school.

Results: 400 trainers trained on the EDA platform monitoring, 10'000 trainees (that either were trained or went through some modules), 71 user entities, 70 training courses, 800 indexed documents.
