

TrainingIndustry.com announces its 2016 Top 20 Learning Portals Companies list

As part of its mission to continually monitor and identify the best providers of training services and technologies, TrainingIndustry.com announces its 2016 "Top 20 Learning Portal Companies" list.

MOS – MindOnSite is proud to be part of the Top 20 again!

Our MOS Chorus platform is a complete learning management (LMS) and learning content creation (LCMS) solution all in one. It integrates 4 complementary modules to ensure the most optimal tracking, management and measurement of your learning programmes. It offers a rich breadth of functionalities and full customisation capabilities.

[Know more.](#)

The MOS Chorus LMS platform has been part of the Top 20 Learning Portal list since 2012.

"Finding the right match in a learning technology partner can not only aid in your employees' ability to retain the information shared in the program, but can also significantly improve marketability and engagement," said Ken Taylor, president, Training Industry, Inc. *"The companies selected for this year's Top 20 List demonstrate significant innovation in how they track, manage and measure learning programs to ensure their learners get the training they need, when they need it."*

"Learning portals are critical to the success of most training programs as they are often the initial point of interaction the learner has with the materials for a given course," said Doug Harward, CEO, Training Industry, Inc. *"The 2016 Top Learning Portal Companies show they understand how important these touches are to the success of your program, while still providing you with the administrative layer required to track and measure your organization's learning initiatives."*
